Dave, the FSP looks good. Please correct the spelling of "Conewago". Also, we may need to add one more well today, if I get the info in time.

Thanks,

Greg

Greg,

Attached for your review is the draft FSP for the collection of residential well water samples from the Miller Chemical Fire Response. Please let me know if you have any question, comments, or edits to this document. Also, please note, that I prepared the plan to include up to 20 samples, in case more well locations are identified. Obviously, we may not collect that many but this gives is some leeway to add locations as you the situation develops and you feel necessary.

As always, feel free to call me anytime if you'd like to discuss.

I spoke with Louise a little while ago, she heard back from the 4th resident and was able to work them into the morning schedule tomorrow. They were scheduled sometime around lunch.

I'll touch base with you tomorrow regarding the sampling progress.

Thanks,
